

BREAKOUT SESSIONS 1 & 2

VAET (Versant Aviation English Test)

Larry Rothenberg

(Pearson Ordinate)

The talk will be centered around the Versant Aviation English Test – naturally

We shall explore the ways in which an automated test addresses the requirements of ICAO document 9835. The focus will be on ways in which remote communication is evaluated by a system that mirrors most closely and effectively the "real-life" situations that need to be assessed, to ensure optimum levels of comprehension. There will be a live demonstration which will show how the test not only makes an assessment, but also identifies areas of potential weakness which can be remedied through specific, focused training program.
